Program Descriptions

VARIETY PROGRAMS

**BRYCE, 1916**
1 pm, Meets at Sunset Point
On this short guided walk, discover the people and events of 100 years ago that introduced Bryce Canyon to the world.

**BRISTLECONE HIKE**
1 pm, Meets at Yovimpa Point (by sign in the parking area)
On this hike, explore the ways in which the National Park Service manages for a healthy forest ecosystem.

**WHERE IS THE MILKY WAY TONIGHT?**
12pm, 1pm, and 2pm, Visitor Center Patio
Learn when and how to see the Milky Way, and how its seasonal changes give us perspective on our galactic address.

**CAN YOU DIG IT?**
2-4 pm, Visitor Center Patio
Stop by to meet some of the creatures who called southwest Utah home millions of years ago. Touch the fossils they left behind and be transported into the distant past. Learn about the science of paleontology, and take home your very own fossil activity book!

EVENING PROGRAMS

**GIANTS OF THE UTAH COAST**
Tour the ancient coast of the Western Interior Seaway, and meet some of the bizarre and terrifying creatures who called it home!

**MYSTERY PROGRAM...**
to be announced

**LEAVE IT AS IT IS... AMERICA'S BEST IDEA**
This year the National Park Service celebrates its centennial. Join us for a glimpse into the agency's history and organization as we embark upon a virtual tour through many of America's National Parks. See how many you know!

ASTRONOMY PROGRAMS

**BILLIONS OF PLANETS OUT THERE! When do we move?**
The discovery of exoplanets. The possibility of interstellar travel. Unique events in earth's long history that have made it our magnificent home. Join us in the exploration.

**LIVES OF STARS**
What's life like for a bazillion-ton atom smashing machine? Join us for a look into the personalities, daily lives, and struggles of the stars that speckle the night sky.

**JOURNEY TO THE VIRGO CLUSTER**
Take a 60 million year Journey through space/time. Explore celestial objects visible from Bryce Canyon's great Dark Skies.

**SEEING THE SOLAR SYSTEM**
From eyes alone to telescopes, spacecraft, and Martian Rovers, join us on a Journey through the solarsystem. Learn about how we see, what we see, and the fantastic discoveries we've made as we've explored our cosmic neighborhood.

**PALE BLUE DOT**
The night sky has inspired us in countless ways since the dawn of humankind. Join us to experience many of the celestial wonders which we have marveled upon us as long as we have been looking up.

***Please note that programs are subject to change.**
