

DAVES HOLLOW LOOP

ROUTES START AT RUBY'S INN

Designed for both ATVs and UTVs

The routes directly behind Ruby's Inn are the closest to the Inn. These short looped routes are unique because they start right outside Ruby's Inn guest rooms and RV/campground sites. Daves Hollow Loop is perfect for ATV riders that are pressed for time or who simply want to take a short ride. We haven't shown times on these routes but distance is shown.

The routes can be muddy after a rainstorm and can also get rutty. They are generally flat and easy to ride, just watch for ruts. There are signs at each intersection showing where you are, oriented with Ruby's Inn as the starting point. These routes are usually groomed in the winter for cross-country skiing.

Daves Hollow Loop is also unique because it connects with the East Fork Road, providing access to longer routes in the East Fork area. To connect with East Fork Road, follow the route (088) south from #5 toward Johnson Hollow.

Daves Hollow Loop is designed for both ATVs and UTVs.
